

Technical Datasheet

Analysis Name:	Enumeration of Mesophilic Aerobics by compact dry
Method Number	LI-00.762.
Scope of Application:	It is applicable to raw materials, line and finished products samples. Pet food, environmental samples and products containing probiotics are excluded from the scope.
Description:	Compact Dry is a ready-to-use dry media sheets comprising culture media and a cold soluble gelling agent, rehydrated by inoculating 1 mL diluted sample into the centre of the self-diffusible medium.
Sample Weight Required:	25 g.
Method Reference:	MicroVal certificate 2007LR01
Analytical Platform:	Cultural Method.

Analyte Reported	Unit of Measure	Limit of Quantification
TVC Result	CFU/g	< 10 CFU/g
	CFU/ml	< 1 CFU/ml
